

INSTALLATION

Step:1 Remove front grille and detach stock halogen headlight assemblies(held by 3 bolts each).

Step:2 Connecting the wire between headlight and car. Makes a parallel connection where the wire for fender DRL and parking lamp of headlight. Adjust ability to turn on-off your halo at will, works as fine and functions as halo DRL, you will be able to turn it off whenever you want

Step:3 To adjust the lighting angle, turn the up-and-down adjustment screw. Then, secure the headlight assembly with the 3 bolts from the stock housing using a hexagon wrench.

USER GUIDE

For the best overall control of the DRL hlao lights-connect the power lead wire to a switch.(if you have an existing switch bank, S-Pod, etc) This will allow you to control the LEDs and leave the lights on when your Jeep is parked.if you do not have a switch and would rather the lights turn on and off automatically, use the included Add-A-Circuit to easily and safely tap power from the fuse panel.We recommend to use fuse location F52 (Cigarette lighter) position.
